Team01_StakeholderNeeds																															
Cat1 Mission Capability																															
N1 Runway Takeoff			↵																												
N2 Lap Count					↵																										
N3 Cruising Altitude				↵																											
N4 Stable Approach						↵														↵											
N5 Landing							↵																								
N6 Takeoff			↵																												
Cat2 Safety & Environment																															
N7 Environment Safety									↵																						
N8 Battery Unobstructed											↵																				
Cat3 Ground Operation & Storage																															
N9 Volume Limits													↵																		
N10 Flight Readiness															↵																
N11 Payload Integration																↵															
N12 Battery Accessibility										↵							↵														
N26 Repairability																		↵													
Cat4 Payload & Battery																															
N13 Payload Requirement																				↵											
N14 Undamaged Components																					↵										
N15 Unmodified Components																						↵									
Cat5 Flight Test																															
N16 Payload																								↵	↵						
N17 Pilotable																										↵					
N18 Telemetry																											↵				
N23 Durability																													↵		
N24 Visibility																														↵	
Cat6 Program Constraints														◐														◐			◐
